

Title: Car Wash Water Recycling Requirement

Policy No.: 800-0005

Effective Date: 03/13/2017

Background:

Georgia EPD standards require the adoption of a local recycled water policy for new drive-through car washes. This standard is in place as a tool to aid in the conservation of water resources and has become a national industry standard practice.

Policy:

Newly constructed drive-through car washes are required to implement a water recycling system as a prerequisite for establishing water service at the facility.
